The chatbot provides accurate information on locations, attractions and activities. As the tips are also described together with pictures, it is absolutely helpful in navigating the city. It also suggested local cuisines and hidden gems that wouldn't have known about otherwise. It would be a really valuable source if it could be enhanced to further developments.

The chatbot is really nice, I like it because there are pictures and a good explanation of destinations. My recommendation would be that alongside of suggesting destinations, it should tell me the prices too. Overall it is really good !!

Overall, the chatbot was very user-friendly and it provided some nice suggestions. Adding in some more specific keywords and some user-input questions may make the chatbot more versatile.

# Feedback

- It's really impressive since we can see photos and few descriptions beside the places. For further improvement, please provide some estimate prices.

- Adding a restaurant list and shopping area to a chatbot can greatly enhance the user experience and provide more value to the users.

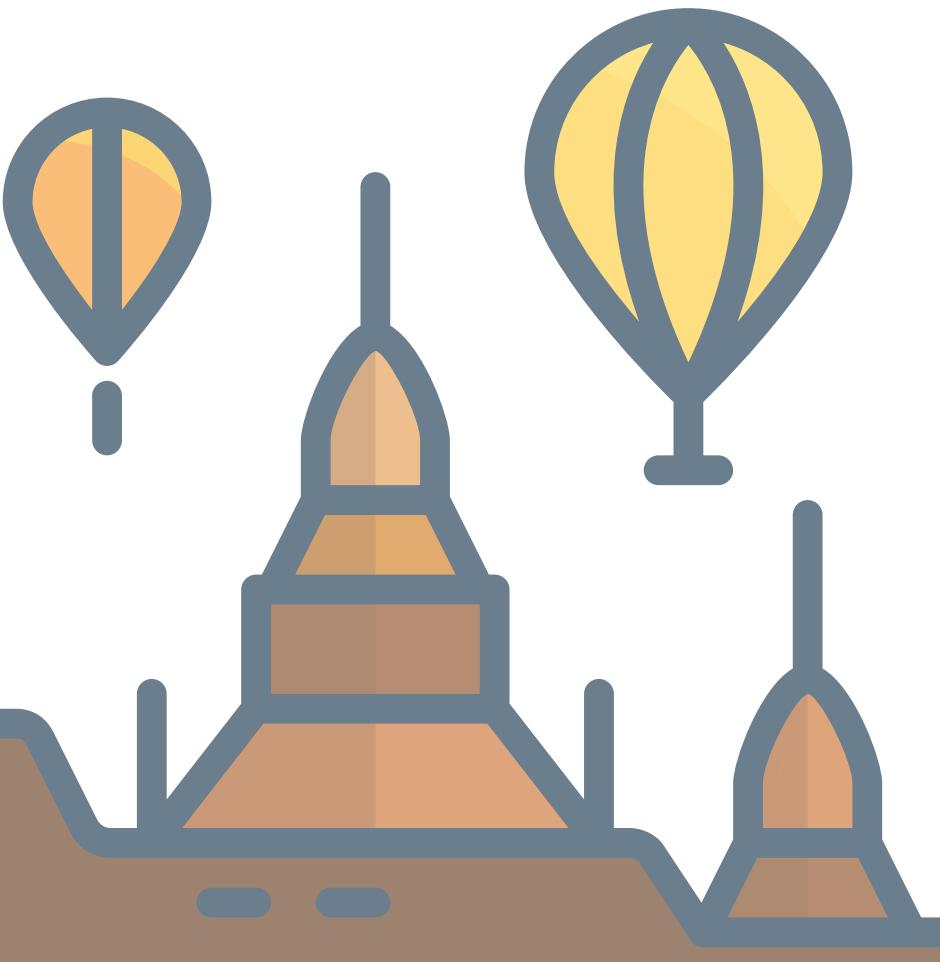

- Give more info about the sub-title.

- For suggestions, after showing some places, that would be better if you explain more details. Overall, it's really good and interesting
